Reality

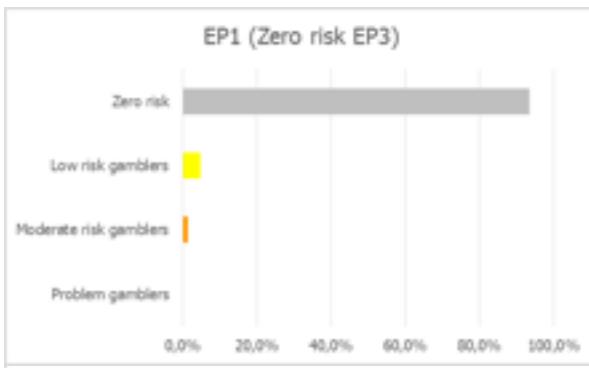

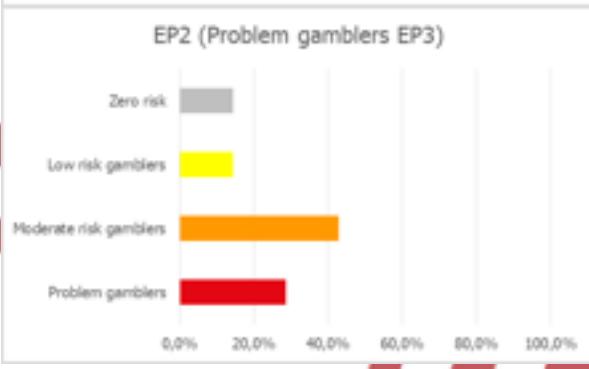

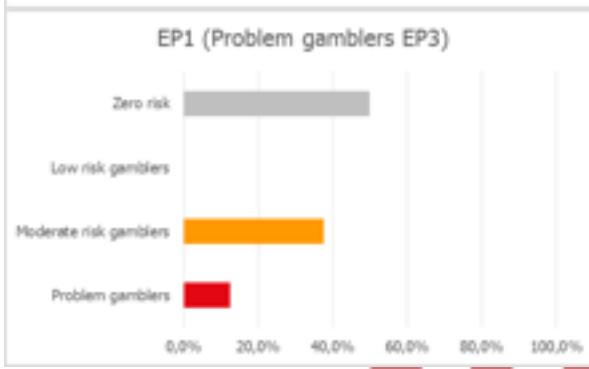

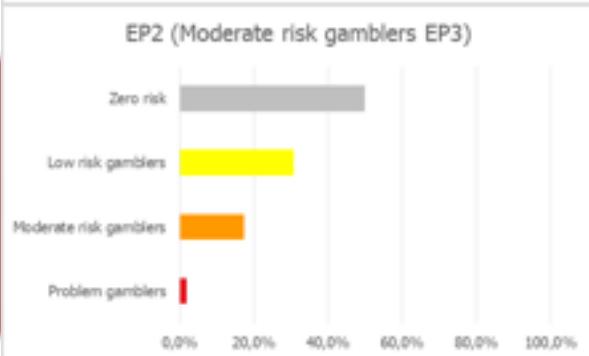

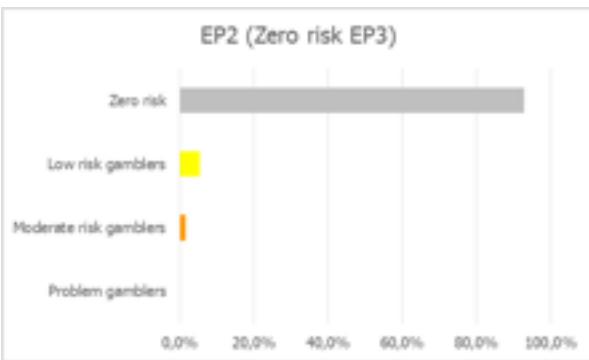

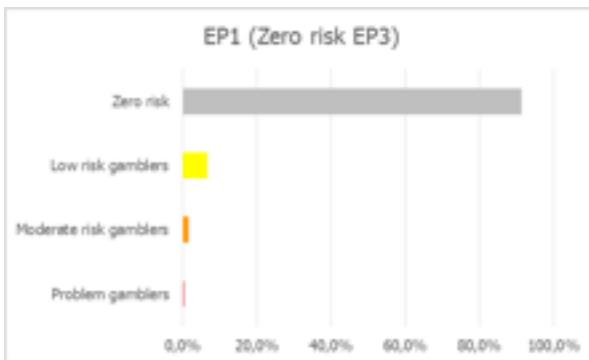

Five ways to study transitions:

- Transitions from Wave 1: how the Wave 1 PGSI risk groups moved over the waves of the study
- Transitions to Wave 3: where the Wave 3 PGSI risk groups came from in earlier waves
- Movers and non-movers: which PGSI risk groups changed or did not change
- Risk group stability in person-years: how stable PGSI risk categories were during the three waves
- Models of transitions: how likely PGSI risk groups are to change during the four waves

Movers and non-movers

	Mover		Non-mover		Total
	Number	%	Number	%	
Un-weighted					
PGSI-category					
Zero risk	286	8%	3223	92%	3509
Low risk gamblers	119	40%	175	60%	294
Moderate risk gamblers	61	66%	31	34%	92
Problem gamblers	1	50%	1	50%	2

	Mover		Non-mover		Total
	Number	%	Number	%	
Weighted					
PGSI-category					
Zero risk	201	5%	3532	95%	3733
Low risk gamblers	82	37%	137	63%	219
Moderate risk gamblers	36	48%	39	52%	75
Problem gamblers	4	100%	0	0%	4

Overall person-years by PGSI categories over EP1-EP3 for completed study sample

	un-weighted (n=3,906)		weighted (n=4,031)		Swelogs EP1 (weighted)
PGSI category	N:o of person- years	%	N:o of person- years	%	%
Non-gambler	4,023	34.3	3,415	28.2	29.4
Non-problem gambler	6,725	57.4	7,997	66.1	62.9
Low risk	714	6.1	481	4.0	5.4
Moderate risk gambler	230	2.0	185	1.5	1.9
Problem	26	0.2	15	0.1	0.3
Total	11,718		12,093		

Risk group stability:

Mean years=mean number observed years in the category.

Stability=% of the observed periods spent in the category

PGSI category	un-weighted			weighted		
	N:o persons at least once	Mean years	Stabilit y (%)	N:o persons at least once	Mean years	Stability
Non-gambler	2,130	1.9	63.0	1,862	1.8	61.1
Non-problem gambler	3,123	2.2	71.8	3,451	2.3	77.2
Low risk	569	1.3	41.8	380	1.3	42.2
Moderate risk gambler	197	1.2	38.9	163	1.1	37.8
Problem gambler	22	1.2	39.4	10	1.5	50.0

Predictors of transition in gambling risk status

- Predictors of transition from moderate-risk gambling to problem gambling
- Predictors of moderate-risk gamblers in all three waves
- Predictors of relapse moderate-risk gamblers versus incident moderate-risk gamblers
- Predictors of low-risk gamblers moving to moderate risk gamblers
- Predictors of lagged transition to higher risk gambling

Category	Wave 1	Wave 2	Wave 3	Victoria	Swelogs weighted	Swelogs un-
Persistent MPG	MPG	MPG	MPG	58	7	15
Persistent non-gamblers	NPG	NPG	NPG	2388	1768	1302
Persistent low-risk gamblers	LRG	LRG	LRG	26	13	23
Non-persistent MPG	MPG	<MPG	<MPG	31	69	59
Decreased high risk	MPG	<= MPG	<MPG	42	71	86
Relapse	MPG	<MPG	MPG	10	3	7
Incident	<MPG	<= MPG	MPG	69	31	42

LRG = Low risk gamblers, NPG = Non-problem gamblers, MPG = Moderate risk and problem gamblers
